PROGRESSED REPORT OF KURT RUSSELL

PROGRESSED MOON

Progressed Moon

The progressed Moon is considered important. The background theme of a person's life can be seen when the progressed Moon changes sign and house. Aspects of the progressed Moon can also be important in the timing of events. Some astrologers consider that the Moon lends its light as it aspects other points in the Natal Chart. Hence a point's importance is highlighted when aspected by the progressed Moon. The progressed Moon is the most important point because it is the only one that progresses through the entire zodiac during the course of a person's life.

Progressed Moon Phase is First Quarter

Moon from 90 to 135 degrees ahead of the Sun.
The Eagles song "Life in the fast lane" could be the catchphrase for this period of your life. That's because your life is about to speed up. It is now is time for action. You have been exploring a new direction in one or more areas of your life for the past seven or so years. Now your efforts are likely to pay off. You may be spoilt for choice by the number of opportunities that arise now. You have the drive and ability to make the most of this phase, however; you may lack discrimination when it comes to making the right choice. Do not despair. You need to remain flexible enough to make the necessary adjustments to keep you on the right course for achieving your goals. It is time to face any fears that may be blocking your path. You may be frightened, but do not hesitate. You may also experience opposition from others as you begin to express yourself more forcefully. Listen to their concerns, make any necessary adjustments but do not let others determine the course of your life. You are in charge and need the freedom right now to learn your own lessons, even if you make some mistakes along the way. Your determination will reap great rewards during this phase. You are learning your craft and your experience will prove invaluable in the future.

Progressed Moon in Aquarius

From 14 Nov 2026 To 22 Dec 2021 05:42

After a phase of consolidation and hard work you are now able to enjoy the fruits of your labour and to spread your wings. In fact opportunities may tumble into your life in rapid succession. You are spoilt for choice. Inspiration is the flavour of this period. The muse may come to you in your own time, or you could be inspired by other people. You are likely to make new friends and associates, perhaps through joining a social club, an organization committed to a

worthy cause or a special interest group. If you enjoy socialising then you are likely to thrive, delighting in a busy social calendar. If you have a more reclusive personality then you may feel somewhat overwhelmed by your social obligations. You could ensure that your social life entails special interest groups or study of a new and stimulating hobby. You could also try spending more time on your personal computer, linking to Internet groups. In fact technology may be a highlight during this phase. Computers, electronics, cameras and other equipment play a more prominent role. Political, environmental, scientific or metaphysical matters may also take centre stage. In the past you may have been busy finished tying up loose ends. During this phase you are ready for something completely new. This could mean a change of job or a new career or a course of study. Alternatively you may have been working towards a specific goal, putting in the groundwork for a project that now takes off. Either way the success of this period will largely depend on how well you have worked towards your goals in the previous few years. If you have frittered your opportunities or allowed yourself to become despondent or distracted then you may find less opportunities during this period. If you acted responsibly then you are now ready to reap the benefits of your efforts. This is not the time to cry over spilt milk, but rather to move forward. You are being urged forward to new challenges. It is important that you take time to reflect on your choices during this period. It would be easy to be distracted with so much activity. You need to follow your instincts and ensure that you complete one task before starting another, rather than leave a trail of unfinished business. This way you can fully benefit from the options available during this exciting phase.

Progressed Moon in the Natal 9th House

From 14 Nov 2026 To 20 May 2022 13:35

It's time to spread your wings and fly! You have a strong urge to explore new horizons during this phase. Adventure is the key. This could be through a complete change of scenery such as moving to a different country, either on vacation or as a more permanent move. You may meet a foreigner who encourages you to visit their homeland. This appeals to you as an opportunity to communicate with people from different walks of life. Another possibility is expanding your horizons through learning. You may undertake a formal academic course or start studying religious or spiritual subjects. Either way you are keen to increase your knowledge, learn from inspirational teachers and share ideas with colleagues. It is also possible that you take up a teaching position during this phase or publish stirring articles or even a book. A new religion may appeal to you during this phase encouraging you to see the world through different eyes. Whatever the scenario being played out in your life, you are on a quest to change your life for the better. You feel an urge to treat life as a journey and are reluctant to attend to mundane tasks. However, you would be wise to rise to the challenge of finding meaning in all things, even the most mundane tasks. Otherwise your loved ones and companions could lose patience with your expeditions in new territories. As the Christian Proverb says: "Wisdom is the principle thing; therefore get wisdom: and with all thy getting get understanding" Proverbs iv. 7 The sign of your progressed Moon will also show you the area of your life most likely to be affected by this newfound need for adventure!
